MANAGEMENT DISCUSSION AND ANALYSIS

2023

The period of 2023 is a difficult year for us. In the first half of the year, we have achieved significant progress in our business operations. However, due to the impact of the global economic environment, our financial performance has been affected. We will continue to focus on our core business and improve our operational efficiency to overcome the challenges.

1. Overall Business Performance

In the period of 2023, our total revenue reached 1.1 billion RMB, an increase of 600,000 RMB compared with the same period last year. This is mainly due to the expansion of our market share and the improvement of our product quality. However, our operating profit has decreased by 100,000 RMB, which is mainly due to the increase of our operating expenses. We will continue to optimize our cost structure and improve our operational efficiency to ensure the sustainable development of our business.

2. Financial Performance

In the period of 2023, our total revenue reached 1.1 billion RMB, an increase of 600,000 RMB compared with the same period last year. This is mainly due to the expansion of our market share and the improvement of our product quality. However, our operating profit has decreased by 100,000 RMB, which is mainly due to the increase of our operating expenses. We will continue to optimize our cost structure and improve our operational efficiency to ensure the sustainable development of our business.

3. Risk Management

In the period of 2023, we have identified several key risks that may affect our business operations. These include market competition, changes in government policies, and fluctuations in raw material prices. We have established a comprehensive risk management system to identify, assess, and mitigate these risks. We will continue to monitor the market environment and adjust our business strategy accordingly to ensure the stability and growth of our business.
